

CALIBRATION MULTIFORMAT

Remote control 1

Suggested use by
EXPERT only for CALIBRATION

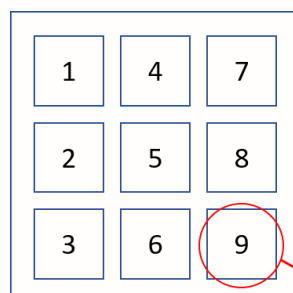

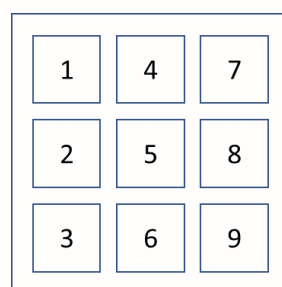

PROGRAM 1

PROGRAM 2

Remote control 2

Push-button panel for the customer
8 formats + close button

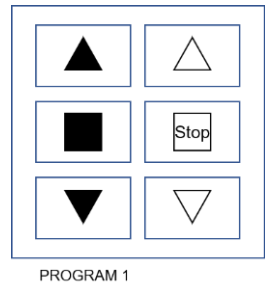

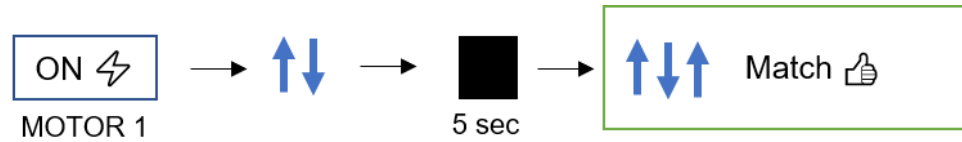

Closing
screen

Legend:

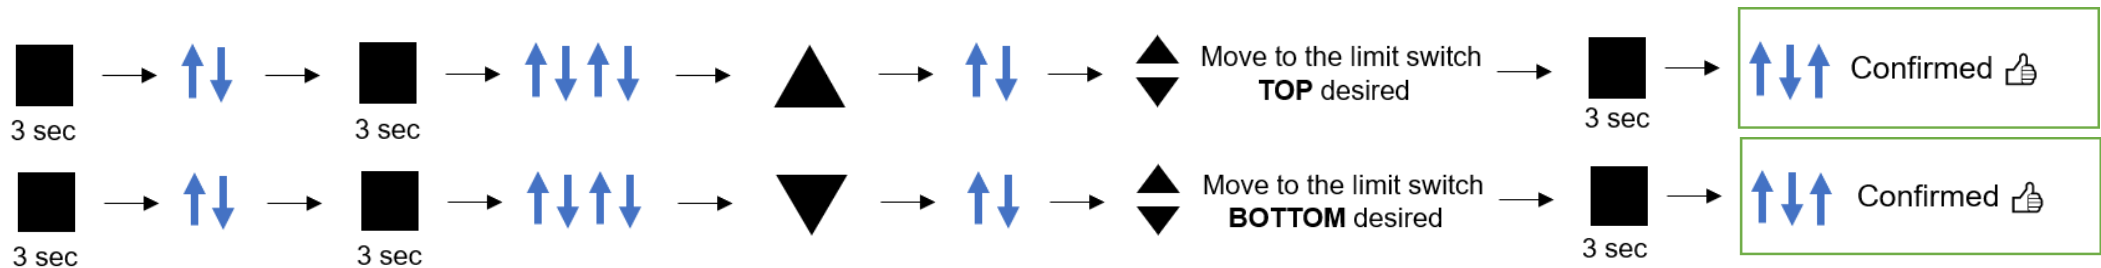

Screen will rotate a little bit up or
down twice

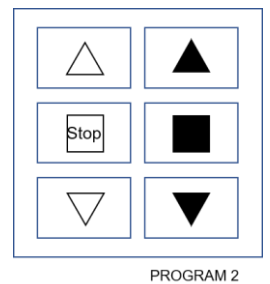

1) Matching remote control 1 / program 1 with motor 1

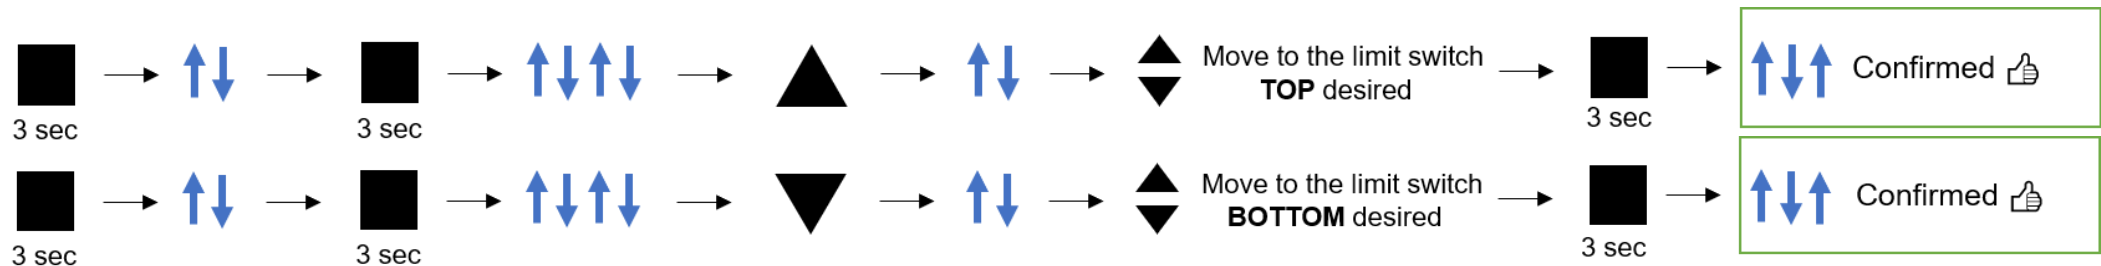

2) Setting limit switch TOP e BOTTOM motor 1

3) Matching remote control 1 / program 2 with motor 2

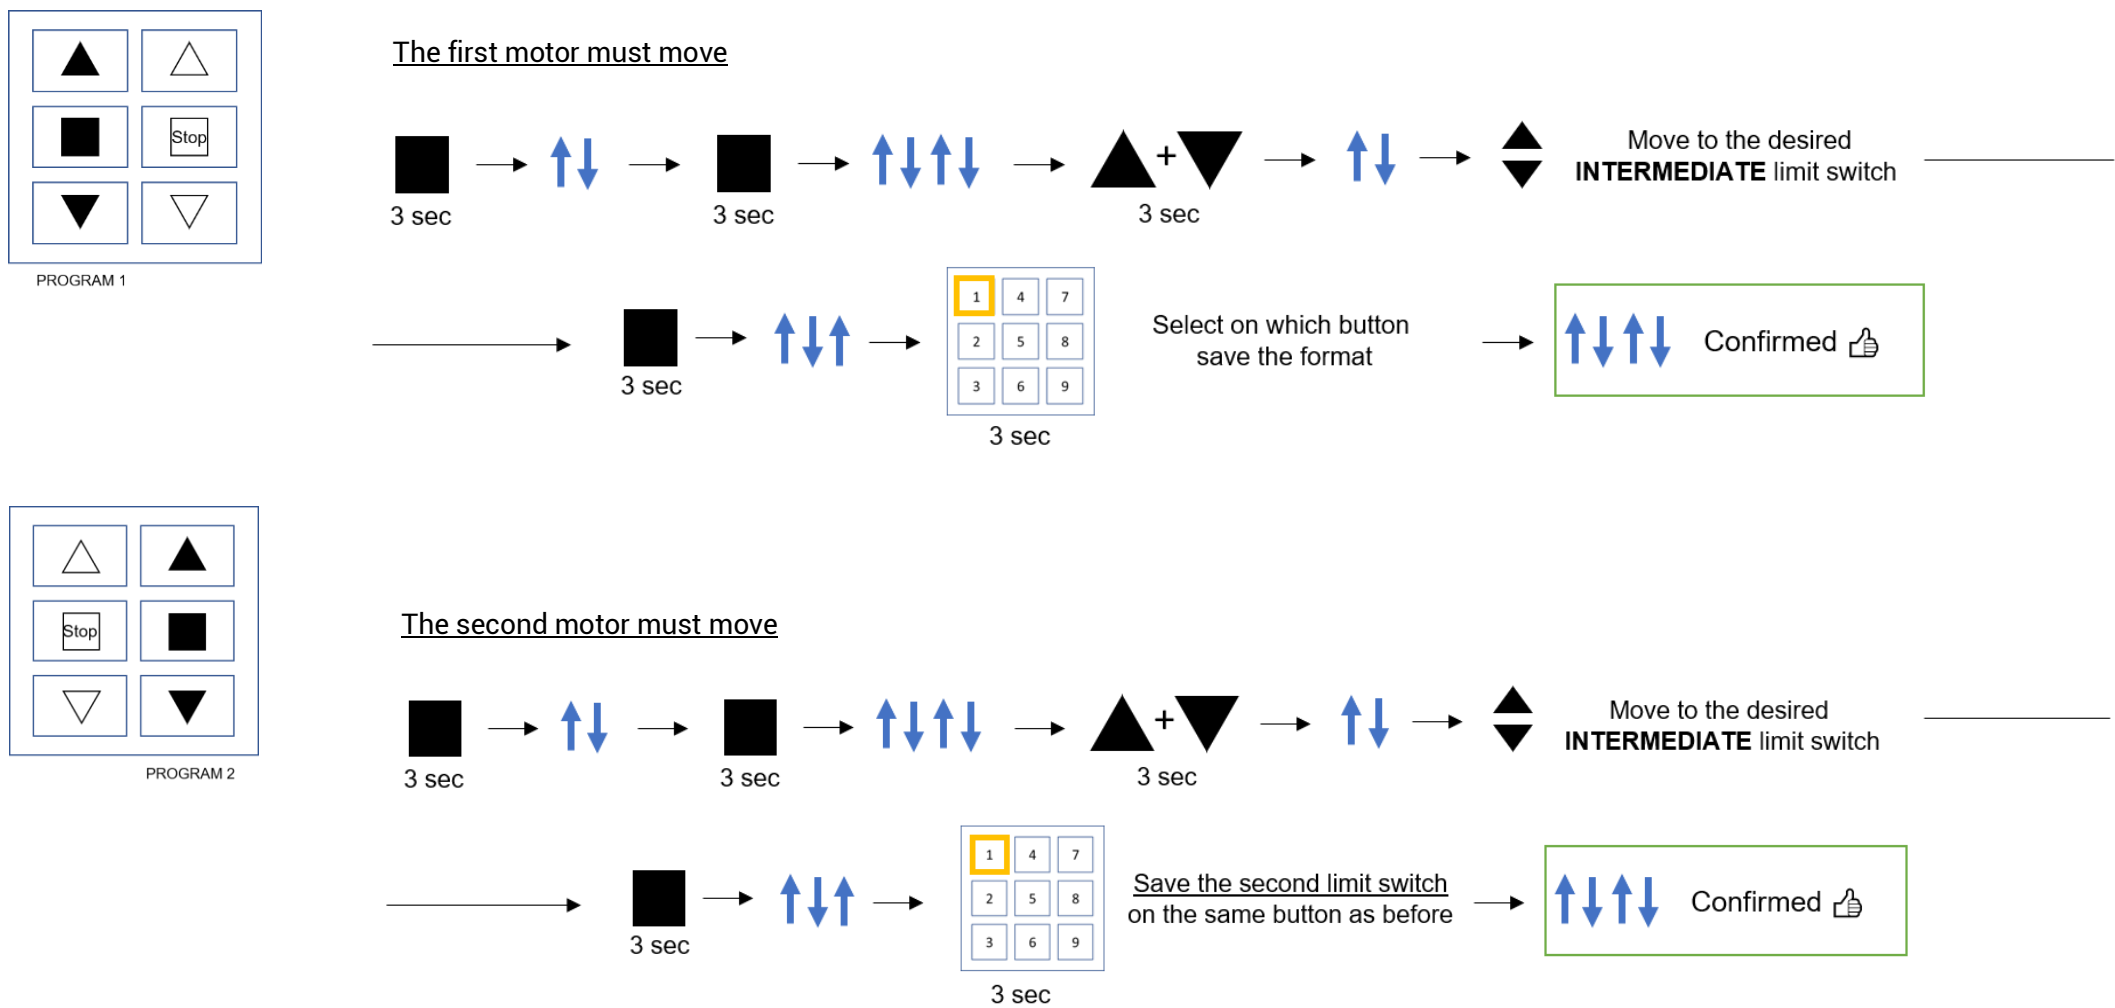

4) Setting limit switch TOP e BOTTOM motor 2

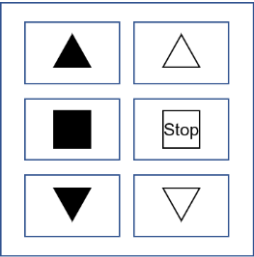

Now it's possible to control the two motors individually from the two programs of the remote control, check that the primary limit switches have been correctly set.

5) **FORMAT CREATION** - create an intermediate limit switch for each motor

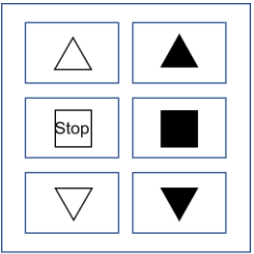

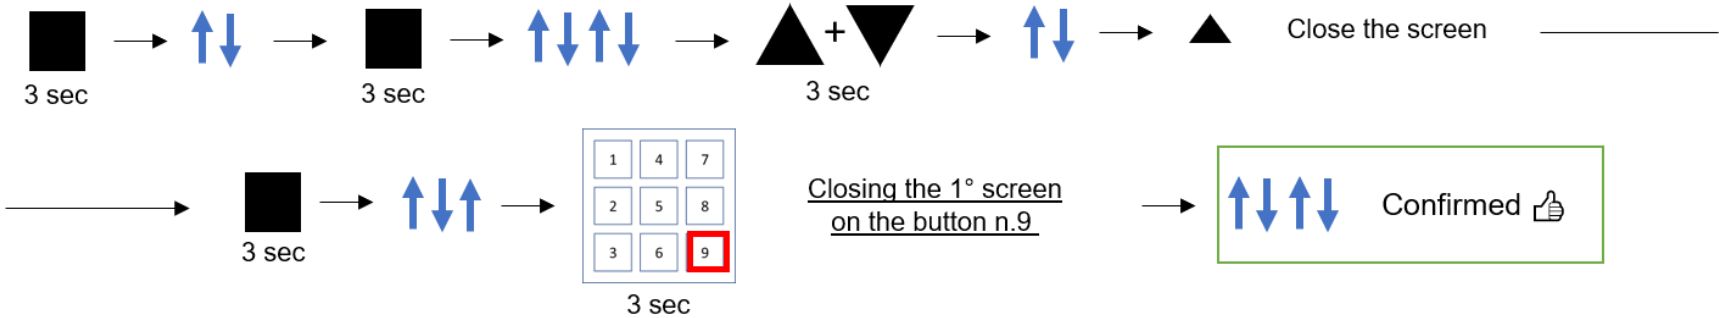

A format has been created, repeat step 5) by changing the number on the customer's keypad to create more formats.

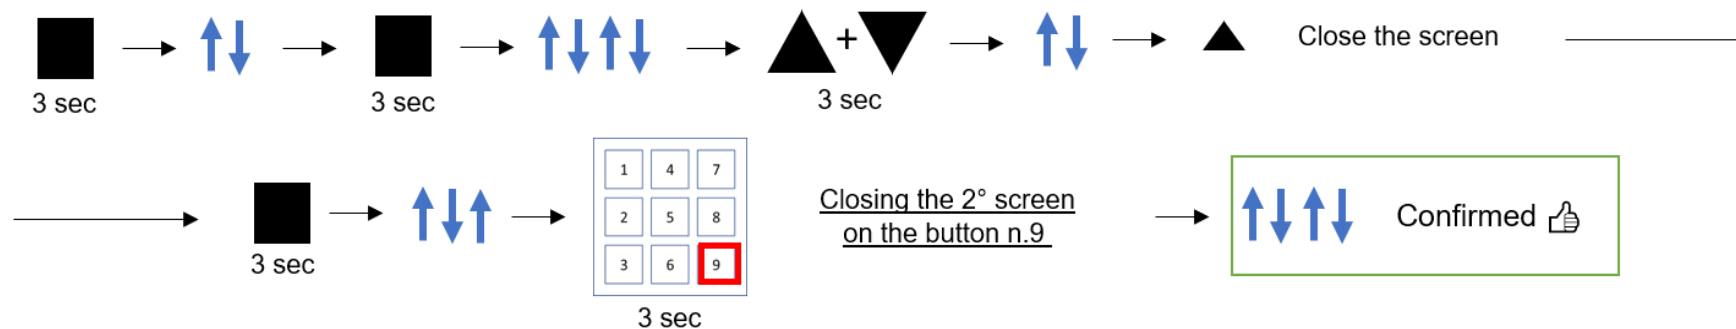

6) **CLOSING SCREEN** – Set the screen closure for both motors to button 9.

PROGRAM 1

PROGRAM 2
