

PRESTIGE

The new model of our fixed-screen category evokes contemporary charm and quality. The concept underlying the modern design of the Prestige project focuses on regular, essential geometric forms.

Prestige distinguishes itself through its black, ultra-slim, technologically revisited aluminium frame, a mere 10x6 mm in thickness, of extreme linearity, expressing the latest taste in the LED OLED monitors market.

To meet the needs of our Customers, this model can be fitted with a range of front-projection fabrics featuring a new spring-tensioning system that ensures correct and constant tensioning. To highlight certain details or to introduce an element of colour, Adeo Screen proposes the installation of optional LED back-lighting for a touch of illumination that lends warmth to the wall.

- > **Projection surfaces:** VisionWhite, VisionWhitePro, ReferenceWhite, ReferenceGrey, VisionAcoustik, VisionMacroAcoustik
- > **Available formats:** 1.78, 2.35, 2.37, 2.39, 2.40
- > **Width:** from 2 to 4 m
