

Architectural Speakers

OBSESSED WITH HIGH RESOLUTION

KEF, one of the originators of British Hi-Fi sound, has more than 55 years of pioneering award winners from professional studio monitors to the legendary Reference Series and the ground-breaking MUON, BLADE and LS50 Wireless.

Every KEF speaker, large or small, epitomises the seamless integration of innovative engineering and outstanding design.

This technology leadership has always been what sets KEF's installed systems apart, ever since our revolutionary Motorised and Soundlight models. Today, you can choose from a superlative range of whole house solutions to suit any space, large or small, outside as well as in. Discreet in appearance, easy to install and engineered to last, what they all share is best-in-class acoustic performance. And that's the real difference - with KEF's architectural speakers, everyone gets to enjoy uncompromised audiophile quality sound.

INSTALLED SUBWOOFERS

If you want your bass to be heard but not seen, KEF offers a wide selection of installed subwoofers with incredible sonic performance whilst remaining visually discreet. The foundation of the range, the powerful KASA500 amplifier (250Wx2) featuring selectable customized equalisation and compression limiting, is designed to maximize the performance of each KEF subwoofer option which includes three superlative subwoofers: The Ci200Q5b-THX with a massive 8inch driver, the Ci3160RLb-THX with three 6.5inch woofers on a rigid aluminum baffle, and the sleek Ci200TRb that requires only 59mm of mounting depth.

EXTREME HOME THEATRE

For the ultimate custom installed home cinema, the formidable Ci-REFERENCE and Ci-R Series has the jaw-dropping acoustic capabilities of the classic KEF floorstander it's named after, with all the drama and emotional intensity of full theatre sound quality. A complete system certified to THX Ultra2/Select2 standards, the Ci-REFERENCE and Ci-R Series consists of two powerful in-ceiling speakers that can be combined with one of four in-wall models and a choice of two sensational new powered subwoofer configurations. As you might expect, its towering performance sets a new standard for custom installed speakers.

EXTREMELY LOW PROFILE

With its patented ultra-low profile speaker driver, the revolutionary T Series fits snugly into even the narrowest voids while delivering all the lavishly detailed and evenly dispersed imagery of KEF's latest tangerine waveguide technology. Comprised of a Round model and a Square model requiring less than 36mm of mounting depth, and a revolutionary 200mm sub-woofer that needs 59mm of depth, the T Series allows you to install a speaker that delivers full audiophile quality sound even when mounting space is at a premium. As easy to fit as any other KEF architectural speaker, and an equally accomplished sonic performer, it's another example of KEF innovation benefiting the installer as much as the listener.

FEATURES AND TECHNOLOGIES

Whatever your budget, you'll find that the clarity, depth and sheer realism of the sound you experience with KEF architectural speakers is enhanced by technologies found nowhere else.

Uni-Q driver array - KEF's patented Uni-Q driver technology places the tweeter at the acoustic centre of the bass/midrange cone so that both act as a single source, dispersing sound widely and evenly over a large area. No matter the placement, KEF custom installation speakers deliver effortlessly natural sound with minimal distortion to every person in the room.

Special Grill Treatment - The powder coated grille has a unique plating process to ensure long life and corrosion resistance even in humid and marine conditions.

Tangerine waveguide - As well as protecting the driver, this enhances Uni-Q's exceptionally wide dispersion characteristics.

IP64 Certification - The speaker passed official IEC testing to ensure that splashing water would have no harmful effects on assembly components.

HIDE YOUR SPEAKERS, NOT YOUR SOUND

For music or movies, your installation needs to deliver the flawlessly accurate three-dimensional sound you'd expect from the best conventional speakers - startlingly clear and breathtakingly realistic. And that's exactly what our Ci range does.

KEF's passion for acoustic excellence shines through in every model. By combining radically innovative engineering with sophisticated design technologies, the Ci range achieves what used to be thought impossible: compact custom installation speakers that sound as compelling as an audiophile quality hi-fi system, no matter where you sit.

With impeccable cosmetics, there's a KEF Ci model for every application, from tiny ceiling speakers the size of downlights to motorised super-premium home theatre speakers that glide into place at the touch of a button.

All KEF speakers are timbre-matched, with each other and with KEF's extensive range of home speakers, so any combination you specify for different listening areas will have the same tonal colour for a perfectly consistent soundstage.

Fast, easy installation has always been valued by installers. With only a few simple steps and KEF's unique design features, architectural speakers can be fitted quickly, with no special skills. Once the hole is cut and the cable run, the area is soon flooded with great high definition sound.

UNI-Q®

KEF's patented Uni-Q driver technology is a feat of acoustical engineering, precisely aligning the acoustic centres of both the tweeter and midrange/bass driver. The result is a point source that effortlessly reproduces sound just as it was captured in the recording, with clear highs, smooth midrange and fast, clean bass all with minimal, sound-damaging distortion. Imaging is precise, and with Uni-Q's signature wide off-axis response, all of the benefits are delivered to every person in the room.

"Hide your speakers, not your sound" - by eliminating the traditional 'sweet spot', Uni-Q allows for complete freedom of positioning, ideal for placement where aesthetics are important without compromising on sound quality. For Extreme Theatre, when installed in-ceiling and close to the wall, the front speakers precisely match the sound to the on-screen action.
